1. Executive Summary

This report presents the findings of a security assessment conducted for Test Corp. The assessment evaluated the security posture of the organization's infrastructure across the defined scope. A total of 1 findings were identified during the assessment.

Risk Breakdown:

High: 1

The assessment identified 0 critical and 1 high severity findings that require immediate attention.

2. Scope

Assessment Types:

- * web

3. web Findings

3.1 XSS

Severity: HIGH

Description:

Reflected XSS

4. Risk Summary

Severity	Count	Percentage
HIGH	1	100.0%

Total Findings: 1

5. Recommendations

- * Implement a comprehensive vulnerability management program with regular scanning cycles.
- * Establish and enforce secure coding practices across all development teams.
- * Deploy web application firewalls (WAF) to provide additional protection for internet-facing applications.
- * Implement network segmentation to limit lateral movement in case of a breach.
- * Conduct regular penetration testing and security assessments.
- * Maintain an up-to-date asset inventory to ensure comprehensive coverage.
- * Implement multi-factor authentication (MFA) for all administrative access.
- * Establish an incident response plan and conduct regular tabletop exercises.
